WHO WE ARE

Capital equipment, bought the way clinicians would want to buy it

MP MedPharma is a New Jersey based supplier of new and certified refurbished medical equipment. Since 2009 we have worked with hospitals, eye clinics and surgery centers on the devices their lists depend on: phaco and vitrectomy platforms, refractive, retina and glaucoma lasers, OCT and diagnostic imaging, slit lamps and surgical microscopes. The catalogue now also serves dental practices, with integrated dental chair units.

A good deal on capital equipment is not the lowest number on a quote. It is knowing what was serviced, what is covered, who installs it and who answers when it stops working. That is the part we take seriously.

WHAT WE SUPPLY

Dental operatory

Integrated dental chair units: patient chair, delivery system, operating light and assistant side, for general, paediatric and multi-chair practice.

HOW WE WORK

Warranty on new and refurbished alike

Warranty coverage applies to every unit we supply, not only the new ones.

Quoted per unit, not from a list

Condition, configuration and included accessories differ on every device, so pricing is quoted against the actual unit and the room it is going into.

Talk to us about your next unit

We quote against the actual unit and the room it is going into.
