WHO WE ARE

Capital equipment, bought the way clinicians would want to buy it

MP MedPharma is a New Jersey based supplier of new and certified refurbished medical equipment. Since 2009 we have worked with hospitals, eye clinics and surgery centers on the devices their lists depend on: phaco and vitrectomy platforms, refractive, retina and glaucoma lasers, OCT and diagnostic imaging, slit lamps and surgical microscopes. The catalogue now also serves dental practices, with integrated dental chair units.

A good deal on capital equipment is not the lowest number on a quote. It is knowing what was serviced, what is covered, who installs it and who answers when it stops working. That is the part we take seriously.

WHAT WE SUPPLY

Cataract & refractive surgery

Phacoemulsification and vitreoretinal platforms, excimer and femtosecond lasers, microkeratomes and topographers.

Lasers & diagnostics

SLT and YAG lasers, retina and glaucoma photocoagulation, OCT and diagnostic imaging, slit lamps and surgical microscopes.

HOW WE WORK

Every unit is inspected and documented

Refurbished units ship with their service history, and we will tell you what was replaced and what was left alone.

Delivered, installed and handed over

For ophthalmic equipment we arrange white-glove delivery, installation and clinical training so the room is working before we leave it.

Warranty on new and refurbished alike

Warranty coverage applies to every unit we supply, not only the new ones.

Quoted per unit, not from a list

Condition, configuration and included accessories differ on every device, so pricing is quoted against the actual unit and the room it is going into.

Replacing equipment?

We buy pre-owned ophthalmic and surgical equipment and make transparent valuations, so the device you are retiring can offset the one you are bringing in. Tell us what you have and we will tell you what it is worth.

Talk to us about your next unit

We quote against the actual unit and the room it is going into.

Alcon 3000LE / Laserex 3000LX

Alcon | YAG Lasers

Nd:YAG laser with straightforward 'aim and shoot' operation and dual-diode aiming for posterior capsulotomy and iridotomy.

Pricing on request

[Details & quote >](#)

Ellex Super Q YAG Laser

Ellex | YAG Lasers

High-performance Nd:YAG laser with dual-beam aiming for posterior capsulotomy and peripheral iridotomy.

Pricing on request

[Details & quote >](#)

Ellex Ultra Q REFLEX YAG Laser

Ellex | YAG Lasers

YAG laser with patented Reflex Technology for capsulotomy, iridotomy, and anterior vitreolysis.

Pricing on request

[Details & quote >](#)

Ellex Ultra Q YAG Laser

Ellex | YAG Lasers

Nd:YAG laser with an ultra-Gaussian beam profile for posterior capsulotomy and peripheral iridotomy.
